PROFESSIONAL SUMMARY

Computer Science (AI) undergraduate with hands-on experience in **full-stack development**, **AI/ML**, **Python**, and **automation**. Skilled at building practical software applications, from web platforms and algorithm visualizers to ServiceNow workflow automations and deep learning models.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript
Web Technologies: React, Node.js, Express.js
AI/ML and Data Science: PyTorch, ResNet-18, Deep Learning, Image Classification
Databases: MongoDB
Platforms and Tools: ServiceNow (Flow Designer, Business Rules, Client Scripts), AWS
Core Concepts: Object-Oriented Programming, Data Structures, Algorithms, CMDB & CSDM

PROJECTS

AI-Driven Analysis: Smart Tourist Safety Monitoring & Incident Response System
React, TypeScript, Node.js, Express.js, MongoDB, AI/ML

- Full-stack tourist safety platform with **SOS alerts**, live location sharing, multilingual support, and offline SOS queuing.
- Includes Safe Journey Guardian, nearby emergency assistance, incident reporting, safety heatmaps, secure evidence management, safety analytics, and an AI Copilot concept for contextual safety guidance.

Algorithm Visualizer *Web Development*

- Built an interactive web application that visualizes algorithms through step-by-step animations to help users understand algorithm execution. Live Project

Employee Onboarding & Offboarding Management *ServiceNow*

- Automated employee joining and exit workflows using custom tables, **Flow Designer**, Business Rules, approvals, and task creation.
- Implemented role-based access, client scripts, notifications, and dashboards for workflow visibility.

Parking Management System *ServiceNow*

- Developed vehicle, parking-slot, and booking record management with automated reservation workflows and duplicate-booking prevention.
- Created reports and dashboards to monitor parking utilization and booking activity.

Image-Based Breed Recognition System for Indian Cattle & Buffalo *AI/ML, PyTorch, ResNet-18*

- Developed an AI-powered image classification model to identify Indian cattle and buffalo breeds using **deep learning**, with feature extraction and an automated prediction workflow for agricultural applications.

Python Flight Ticket Booking System *Python, OOP*

- Developed a flight ticket booking system using Python and object-oriented programming, implementing booking workflows and seat-availability handling.

Python Expense Tracker *Python, Data Structures*

- Built a command-line expense tracker with data storage and expense calculations using core data structures.

INTERNSHIP EXPERIENCE

Python Intern — Flight Ticket Booking System

- Applied Python and OOP concepts to build booking workflows and seat-availability logic.

Python & Data Structures Intern — Expense Tracker

- Used core data structures in Python to store expenses and perform calculations in a command-line application.

EDUCATION

Ballari Institute of Technology, Ballari *Expected 2027 | CGPA: 8.03*
B.E. in Computer Science Engineering (Artificial Intelligence)

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA)
- ServiceNow Certified Application Developer (CAD)
- ServiceNow CIS — Data Foundations (CMDB & CSDM)
- AWS Certified Cloud Practitioner
- Python Programming — EZ Training and Technology
